Setup

TODO

Odd Page

(or all pages `#if book = false`)

Margin-Notes

By default, the `#note[...]` command places a note to the right/outer margin, like so:◆. By giving the argument `reverse: true`, we obtain a note on the left/inner margin.● If we▲ place multiple notes in one line, they automatically adjust their positions (Up to a limit of apparently up to three. I am not sure why exactly this is, as the shifts should not have cyclical dependencies but it should be able to calculate them in-order). However, a `dy` argument can be passed to shift them by that length vertically.

The margin notes are decorated with little symbols, which by default hang into the gap. If this is not desired, set the configuration option `flush_numbers: true`. Setting the argument `numbered: false`, we obtain notes without icon/number.

It is recommended to reset the notecounter for every page in the header. TODO how?

Wide Blocks

Note that setting both `reverse: true` and `double: true` will panic.

`#wideblock[...]`: Whilst a bit hacky, it is possible to use notes in wide blocks:◆, but make sure to set the `reverse` argument appropriately.○

`#wideblock(reverse: true)[...]`: Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et.

`#wideblock(double: true)[...]`: Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequi doleamus animo.

◆ This is a note.

■ Note 1

▲ Note 2

Like this.

○ Or ensure that the notes don't overlap the wide block some other way.

● Reversed.

◇ Voila

Even Page

Margin-Notes

Margin notes adjust themselves to even pages. Here, to get to the right margin, now the inner margin, we use reversed notes.

Comme ça.

Wide Blocks

`#wideblock[...]` Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat.

`#wideblock(reverse: true)[...]`: Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore.

`#wideblock(double: true)[...]`: Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequ.

Ta-dah!
